

## On the Subject of Pizza

*Any pizza is a personal pizza if you try hard and believe in yourself.*

Ingredients will come and go on a conveyor belt. Every now and then the phone will ring and an order will be placed. Check the menu and personal preferences below to determine the needed ingredients. Serve three pizzas successfully to solve the module. If you don't respond to an order, you **will not** be penalized (a friendly coworker will pick it up). If you serve something the customer didn't want, you **will** receive a strike.

Clicking an ingredient on the belt will move it to the preparation area. Clicking it on the preparation area will move it back to the belt. For both moves you'll need an empty spot to move to. The preparation area has eight spots. If you collected all needed ingredients for the current order, click the order to prepare and serve the pizza.
